

Appendix B

Final interview with the client

The original language of the interview was Russian, as the client doesn't know the English

Me: Hello! What are your thoughts about the final version of the application?

Client: Hello! So, overall, I liked the program that you created. It looks as the usual application, but has some uniqueness.

Me: I am glad that you liked it. Let's break down the program. What do you think about the design? Does it include all your preferences? For example, favorite color, font size etc.

Client: I really liked the design. First of all, you used Kazakh national ornament, which is connected with the topic. Moreover, you took in to the account my wishes because my favorite colors were used. Also, the font size is readable. In addition, I liked that you wrote the explanation of the examples on both languages: Kazakh and English.

Me: What are your thoughts about the educational part?

Client: I liked that you provided with the range of information of English grammar. Some, pictures, schemes were included. In my opinion, it is better that you included different type of information, as people perceive the information in different ways.

Me: What are your thoughts about entertaining part?

Client: You had two different games that check the gathered knowledge.

The game that calls “ Filling the blank” is very useful in order to test the knowledge about the tenses. The second game was also useful.

Me: Thank you! Good-bye!

Client: Good-bye!
